Danil Grantsev

Full-Stack Developer · .NET / Python / React

Vietnam (UTC+7) · Open to remote · malooyy6@gmail.com · t.me/rezzodan · github.com/Rezzodan/Portfolio

SUMMARY

Full-stack developer with **2.5 years delivering a production fintech platform end-to-end**: backend APIs, client apps inside Telegram and MAX, operator and partner portals, CRM integrations, and the self-hosted infrastructure they run on. Comfortable owning a feature from database to deploy and the incident afterwards. Security-minded: home lab with SIEM and IDS, OWASP Top 10.

EXPERIENCE

Full-Stack Developer (Platform & Infrastructure) — LLC "100KVADRATOV" **Mar 2024 – Present**

Fintech / credit-consulting company · Ufa, Russia · remote

- Built the core REST API (C#, ASP.NET Core, EF Core, PostgreSQL, Hangfire) behind the client mini app, operator admin, bots and lawyer workflows: user and deal lifecycle, document upload, e-signature, statuses, CRM sync.
- Shipped **one React/TypeScript codebase as both a Telegram and a MAX Mini App** through a platform bridge layer; fixed a webview SDK conflict that left MAX users on infinite loaders.
- Developed a partner portal (Django / DRF + React) with commission accrual from CRM webhooks; eliminated duplicate payouts on installment deals with explicit per-pipeline accrual rules.
- Built FastAPI services for lawyers and bureau automation: Bitrix24 sync, credit-bureau report parsing (NBKI, OKB), OCR, DOCX claim generation and human-controlled mail sending.
- Ran production for **7 services** on a self-hosted server: Docker Compose, Traefik HTTPS, PostgreSQL backups, self-hosted mail, runbooks; resolved 7+ production incidents.
- Currently building **Credit Enot**, a new B2C mobile app (React Native / Expo + ASP.NET Core API).

PROJECTS

- **Portfolio case studies** — architecture, scope and hard problems of each production service (NDA-safe): github.com/Rezzodan/Portfolio/development
- **Security lab** — Wazuh SIEM, Suricata IDS, OWASP Top 10 on DVWA, incident reports, and a Python SSH brute-force monitor with tests and CI.

SKILLS

Backend: C#, ASP.NET Core, EF Core, Hangfire, Python, FastAPI, Django / DRF, REST, JWT, webhooks

Frontend: TypeScript, React, React Native (Expo), Vite, MUI, React Query

Data & infrastructure: PostgreSQL, Docker Compose, Traefik, Linux, Bash, Git, GitHub Actions, SMTP / SPF / DKIM

Integrations: Bitrix24 CRM, Telegram and MAX Mini Apps, OCR and PDF processing

Languages: Russian (native), English (A2, improving)

CERTIFICATIONS & EDUCATION

- **Google Cybersecurity Professional Certificate** (Coursera) — in progress, 3 of 8 courses completed
- **C Programming Fundamentals** — Stepik, 2025
- **Bashkir College of Economics and Law** — Banking and Financial Services, 2017 – 2019
